What is this pdf about?

This PDF is about **Final project Milestone 2**, which documents the creation and testing of a database schema for a project.

According to the document, it specifically includes:

- **SQL scripts** to create and drop tables for two entities: `Developer` and `Game`.
- **Sample data** inserted into both tables.
- **Test queries** to verify the table creation and data insertion.
- **A status report** outlining what is currently working (schema creation and relationships), what is incomplete (normalization and application integration), and the planned next steps (combining the ER diagram with the SQL script and implementing more queries).
